## Custom Services:

### Artwork Reverse:

Minimum" -	\$5.00
50-100" -	\$7.50
101-150" -	\$10.00
151-200" -	\$15.00
201-350" -	\$20.00

Borders .....\$75.00/hr. - 1 hr. minimum  
 (Borders are necessary to give definition to your overall design. Borders can be square, contour or outline. Refer to the Tech Tips on the back for examples.)

Rush Charge .....\$100.00  
 (Depending on production schedule.)

### Sawing:

Straight trim .....\$1.25  
 Custom Contour Sawing .....\$75.00/hour, 15 minute min.

## Cost Estimating:

Measure the length and the width from the most extreme points of the image area. For fractions, round up to the next 1/4". Add 1" to both length and width. Multiply length times width to calculate total square inches. Call us as 1-800-444-5552 or e-mail us at engraver@owossographic.com for free estimates.

## Tech Tips:

### Copy Preparation & Quality:

Please provide an electronic file, same size negative, or positive film. Dense, clean, and sharp-edged copy will yield the best results.

Don't forget that what you see on paper looks very different when "translated" onto fabric.

Images that are black will be pressed into the fabric. Images that are white will be "puffed" up on the fabric. Depending on the outcome you wish to achieve, OWOSSO can reverse the artwork for you. Based on your artwork, just let us know if you want the white or black areas puffed up on the fabric.

When you are ready to send us your job, you can refer to OWOSSO's brochure entitled "Placing Your Order." It has a very thorough review of what you need to do before sending your project to us. You can use our convenient electronic ordering process or mail your artwork to us.

### Artwork Quality:

When creating artwork, keep in mind that bolder lines and open detail emboss best. Fine, closed detail and small images don't allow enough space for the fabric to be pressed or puffed, and limit the overall embossing height. Bold, open designs can be more easily recognized on the finished product. Try to avoid serifs on type. To achieve maximum embossing height, keep your line sizes at least 1/8".

### Borders:

Borders are necessary to give definition to your overall design. Borders can be separate, enclose the artwork, or be part of the design as an outline or contour style. (See below). If you have questions about borders, please give us a call.

**OWOSSO**

Black area pressed into the fabric. Inside white area is "puffed" up on fabric.

**OWOSSO**

If no other edging is prescribed, the edging will be square cornered as shown.

**OWOSSO**

Contour Border. Black outline pressed into the fabric. Inside white area is "puffed" up on the fabric.

**OWOSSO**

Outline die. Black outline recessed into the fabric. Inside white area is "puffed" up on the fabric.

Sixty years after our company began, Owosso Graphic Arts, Inc. continues to set the industry standard for both craftsmanship and service. We take pride in all our products and services, including our fabric embossing dies that can create three-dimensional images on a variety of fabrics. Often combined with embroidery and other techniques, these eye-catching decorations can enhance clothing and accessories such as hats and bags.

As America's largest brass, copper and magnesium photoengraver, our overriding goal is complete customer satisfaction no matter the size or scope of your job. To do this, we deliver new technologies, along with good old-fashioned small town values such as honesty, integrity, and hard work. We promise, our dies and our company will leave a lasting impression.

We look forward to helping you with all of your die needs.
